

REPLACEMENT SHEET

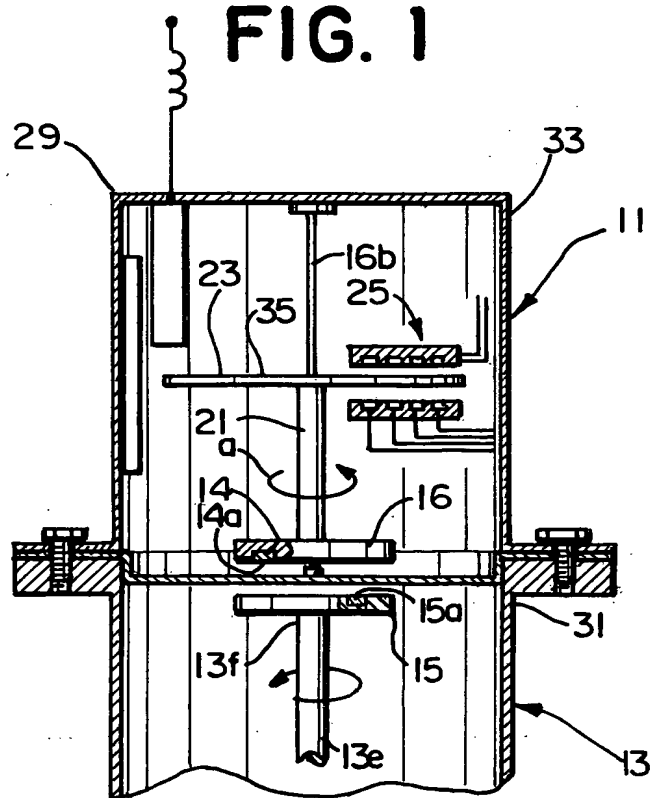

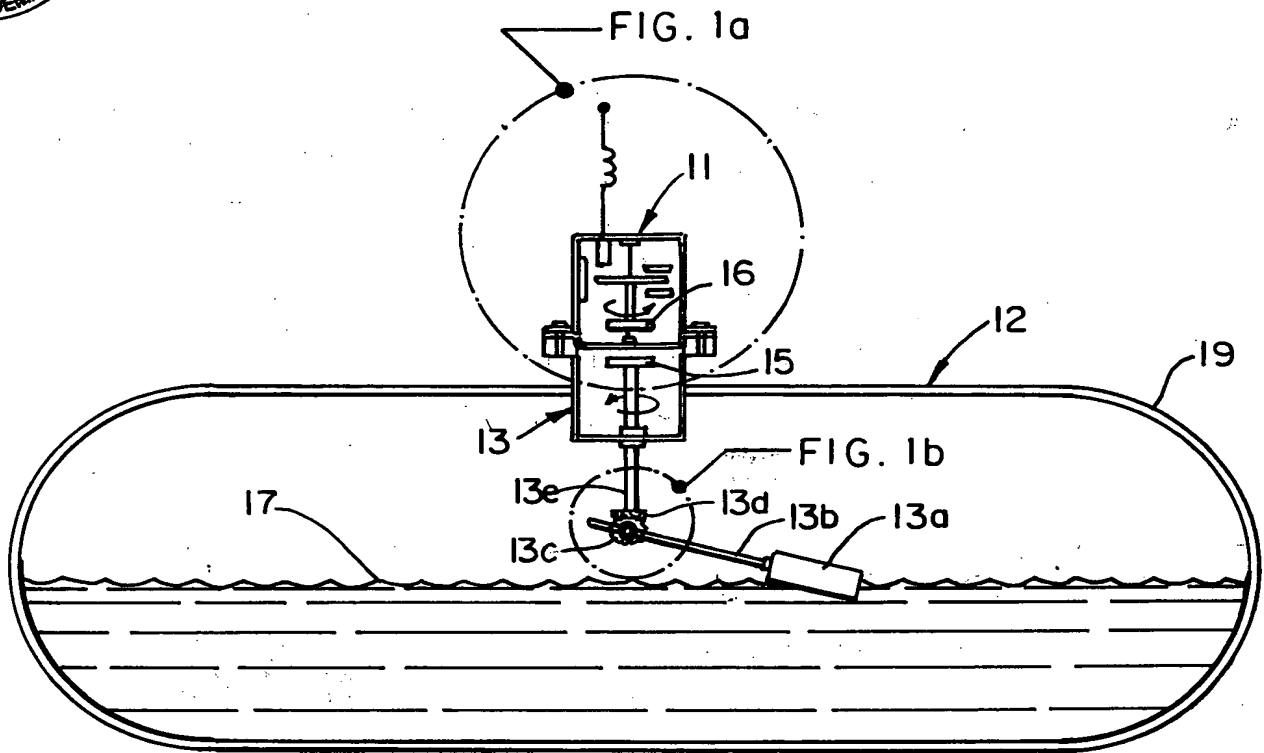

FIG. 1a

A schematic diagram of a circular disk-like device, labeled 23. The device consists of several concentric rings and radial segments. The innermost ring is labeled 49a. The next ring out is divided into segments, some of which are hatched and labeled 43. The outermost ring is also divided into segments, some of which are hatched and labeled 43. A dashed line indicates a boundary or interface between the inner and outer rings, labeled 37. A radial line segment is labeled 41, and its angle from the horizontal is indicated by an arc labeled 41a. Another radial line segment is labeled 39, and its angle from the horizontal is indicated by an arc labeled 39a. Other labels include 45, 47, 49, and 43, pointing to various parts of the disk.
